Santa Clara University is home to generations of leaders innovating with a mission. Ethical global citizens who transform lives, shape society, and aspire to make the world a better place.

Our campus is in Silicon Valley, but our impact is felt around the world. We engage with heart and mind to address society’s foremost economic, political, and social challenges.

We invite you to participate in The Campaign for Santa Clara University. Support our mission and inspire the next generation of leaders.
Amid a culture of change that spans nearly two centuries, Silicon Valley has been home to our treasured University—an incubator of ideas and ideals that embody the region’s spirit.

A campus where pioneering innovations ascend from graduates fashioned by Jesuit social consciousness, ethical character formation, and high-tech ingenuity.

The impact of our community of students, alumni, parents, faculty, staff, and friends is undeniable. Together we forge solutions to help solve the world’s most pressing challenges.
Jesuit Values in Silicon Valley
Shadows cast from campus palms offer space for quiet reflection.
Values-Based EDUCATION

At Santa Clara University, we instill fundamental leadership skills, ethics, and values in each student who receives our revered diploma. Values that lead to the ultimate goal to protect individual freedoms and advance social justice. Upholding these virtues hinges on our University’s sustained commitment to mold leaders of resolute moral integrity.

Leon Panetta: “We are living in a time in which the core values the University represents are being tested. The values of truth. Respect for one another. Preserving human dignity. And the responsibility to do good and to help others. This is all being tested now. Too often we move to move. Not often enough do we move forward. I think that is what the University offers: a foundation that enables the ability to advance progress while elevating human dignity. “Santa Clara University instills in its students a values system that advocates that no matter what we create or how fast we move, we must keep an eye on the basic values of decency and respect. We must recognize the importance of improving the lives of those around us before our own. “We exist in the heart of Silicon Valley innovation. And so long as we innovate with the heart, we innovate with a mission.”

Santa Clara University School of Law, one of the nation’s most diverse law schools, is dedicated to graduating lawyers who lead at the complex intersection of law, technology, business, justice, and ethics.
Leon Panetta ’60, J.D. ’63, H ’88, H ’13, P ’96, Chair, Panetta Institute for Public Policy; Former CIA Director; Secretary of Defense; White House Chief of Staff; and Member of the House of Representatives
Campaign Co-chairs Karen and Jeff Miller ‘73, MBA ‘76, and Susan and John A. Sobrato ‘60, P ’83, P ‘94, have generously provided Santa Clara University with decades of volunteer leadership, inspiration, and philanthropic investment.
John Nobili, S.J., founder and first president of Santa Clara College (1851–1856), described the College’s goals in terms typical of the era: “To cultivate the heart, to form and cherish good habits, to prevent and eradicate evil ones.” By 1875 we enrolled more than 275 students at the preparatory and collegiate levels.
Erika Francks ’17, Global Social Benefit Fellow, Valedictorian, Fulbright Scholar, Rhodes Scholar Finalist
Engaged Learning and SERVICE

The Santa Clara University undergraduate experience stands in contrast to that of other institutions. Myriad opportunities are available for reflection with a focus to serve and improve the lives of the disadvantaged. Here students share in learning experiences grounded in ethics—a holistic approach that leads students to resolve today’s most demanding issues.

Erika Francks: “How would I describe the Santa Clara University experience? Rigorous. Composed of more than academics. And because of our Jesuit, Catholic ethos, it is undoubtedly values-based. The experience puts us one step ahead of graduates of any other university.

“Starting in my junior year, I participated in Miller Center’s award-winning, nine-month Global Social Benefit Fellowship. The Fellowship provides a comprehensive program of mentored, field-based study and action research with social enterprises that have participated in Miller Center’s Global Social Benefit Institute accelerator programs. I was exposed to a worldwide network of social entrepreneurs resolute in addressing energy poverty and climate change.

“As part of my eight-week summer field experience—combined with two quarters of academically demanding research—I worked with an interdisciplinary team to develop marketing and fundraising materials for ONergy Solar, a social enterprise that provides rooftop solar home installations, irrigation pumps, lighting, and microgrids in Kolkata, India.

“My passion to end global poverty and protect the planet through entrepreneurship is unyielding. I was recently awarded a Fulbright Scholarship and will take a 10-month leave from my job as a management consulting analyst for Accenture to measure the economic impact of solar microgrids for rural electrification in remote communities of Lesotho.”

Miller Center for Social Entrepreneurship has no equal—it is the largest and most successful university-based social enterprise accelerator on the planet. It envisions a world where all people are architects of their own futures.
A Monumental Goal

$1B
At the core of more than 44 dynamic campaign initiatives is the University’s strategic plan.

The plan—composed of pivotal goals and objectives—was developed by our faculty, staff, and leadership. It leverages strengths, capitalizes on opportunities, and provides insightful direction for the future of our treasured institution.

Now, as we embark on this historic $1 billion campaign, we are poised to build on the successes of our academic programs and links with Silicon Valley’s vision. An attainable goal lies before us: to become one of the world’s most prominent universities—grounded in the liberal arts—leading the pursuit of ethical leadership, technological innovation, and entrepreneurship in the service of humanity.
The Santa Clara University experience must take the lead to ensure its relevance for generations to come.

Realizing the promise of a superior education requires a commitment to provide nationally recognized faculty, apply revolutionary teaching methods, and develop unrivaled academic programs.

To mold future industry and community leaders, it is our obligation to provide a rigorous curriculum, one that puts theory into practice. As a best-in-class University, we must be steadfast in our commitment to provide students, alumni, and faculty with the knowledge, skills, and resources to tackle complex societal issues.
A Mission to Create a Better World.
For a century, the wisteria of the Mission Garden has produced its spring bloom.
Albert Bruno, Ph.D., William T. Cleary Endowed Professor, Leavey School of Business
EXCELLENCE

Endowed chairs are reserved for our University’s most distinguished faculty. For more than 15 years, Albert Bruno, Ph.D., has served as the William T. Cleary Professor, an endowed chair within the Leavey School of Business. Today he inspires students and formulates programs to advance innovation and entrepreneurship worldwide.

Albert Bruno: “My academic life at Santa Clara University is simple to explain: empowering generations of developing minds to be critical thinkers and lead with conscience and compassion. This is what we do at Santa Clara University, no matter the program or department. We challenge students to think with the heart. And when you instruct at a single University for as long as I have, the footprint is humbling.

“Forty-seven years. For 47 years, students have passed through my doors. Some have gone on to lead the world’s most successful corporations. Others founding enterprises of their own. A select few return home to Santa Clara University to mentor students, as they had been. Students they see themselves in.

“One of my favorite Santa Clara University stories is that of the birth of what is now known as Miller Center’s Global Social Benefit Institute. A classic Silicon Valley entrepreneurship story. When Patrick Guerra [’73, MBA ’76, P ’02] and I founded the Institute in 1997, we did not have any funding. Quite frankly, we did not have any social entrepreneurs. We put together a program curriculum and arranged for the arrival of participants from Rome. Patrick even put his expenses on personal credit cards. It was very grassroots. Eighteen years later, a former student of mine would endow nearly $25 million to ensure the future of the Center. Jeff Miller and his wife, Karen.

“When alumni of the University remain passionately involved in their alma mater for years after graduation, you know the institution is doing something right. I would like to think that part of that something is our professors. People genuinely committed to nurturing the world’s foremost ethical leaders.”

The campaign seeks to honor an elite set of faculty—who strengthen our departments and schools—with a number of new endowed professorships and chairs.
Serving as teachers, spiritual counselors, and friends, our University’s resident Jesuits have been a guiding force throughout our history. Today Michael Zampelli, S.J., M.Div. ’92, S.T.M. ’93; Dennis Smolarski, S.J. ’69; Paul Mariani, S.J., M.Div. ’02; Jack Treacy, S.J. ’77, M.Th. ’90; William Rewah, S.J., H’01; and Arthur Liebscher, S.J. ’69, M.Div. ’84, S.T.M. ’86; are among those carrying on this important legacy.
Named for Jesuit meteorologist Jerome Ricard, S.J., the observatory symbolizes our distinguished history of scientific and engineering advancements.
Inspiring Discovery of PURPOSE

Students enroll in Santa Clara University because they are attracted to an experience that transcends generations. Rigorous academics. Tight-knit community. In the middle of a dynamic metropolis with infinite career opportunities. And timeless Jesuit, Catholic values. This transformational journey that leads to the steps of our commencement stage is shepherded by renowned professors committed to elevating the student experience.

Korin Wheeler: “As faculty of the University, our passion lies in helping students discover purpose—impacting knowledge and confidence to shape the world around them, for good. This is a critical element of the Jesuit, Catholic ethos. Putting others before the self.

“If the University exists to educate men and women for others, think about the potential impact of our graduates in the fields of science, technology, engineering, and mathematics. We are talking about students equipped with the dual mind-set of an ethics-based academic experience, in the heart of one of the most innovative places on earth—Silicon Valley.

“Within the Department of Chemistry and Biochemistry in the College of Arts and Sciences, I am surrounded by a diverse field of teacher-scholars. Faculty who push one another to innovate. People who ensure that students have access to modern instruction methods and cutting-edge instrumentation. Community builders. So often we ask our students, ‘You have all of this knowledge: What will you do with it?’ The response is harmonious: ‘Create a better tomorrow.’

“To support the campaign is to support a worldwide network of alumni, faculty, and students committed to solving problems with the heart and mind. Something the world needs now more than ever”

The Sobrato Campus for Discovery and Innovation will house engineering and natural science departments, along with Miller Center for Social Entrepreneurship. The vision will come to fruition as a state-of-the-art teaching, learning, and research environment.
Korin Wheeler, Ph.D., Associate Professor, 
Department of Chemistry and Biochemistry, College of Arts and Sciences
To support the planned growth of the University, gifts will be allocated across three different campaign priorities and general University funds.

- **Opening Doors: $209.5 million**
  Grow financial resources that open doors for deserving students and heighten national recognition

- **Educating the Whole Person: $166.55 million**
  Ensure and enhance the holistic education that we promise to every student

- **Innovating for the World: $334.5 million**
  Raise awareness and address social inequity across a global community and economy

- **General University Funds: $289.45 million**
  Support for University Operations
To maintain our exemplary standard to attract and retain the world’s most sought-after students and faculty, the University has pledged to expand academic programs, experiences, resources, and facilities.

To that end, nearly $400 million has been allocated to enrich collaborative student-learning environments. Within that goal, $278 million is designated for state-of-the-art learning facilities, $70 million to experiential learning opportunities for students, $34 million for recruiting extraordinary faculty, and $13 million for programs to inspire innovative teaching.
The esteemed reputation of our internationally recognized University has reached an all-time high.

In recent years, we have seen tremendous growth in the quality and quantity of students applying for admission to our undergraduate, graduate, and doctoral programs. Now more than ever, our graduates—of diverse cultures, backgrounds, and circumstances—are vital to sustain prosperous global communities and industries. This diversity enriches the Santa Clara University experience immeasurably, adding contemporary perspectives integral to multifaceted learning.
Join the Momentum. Support Our Mission.
The tranquil sounds of the Mission Fountain extend a respite to visitors.
Ensuring Unimaginable OPPORTUNITY

Today the choice to invest in a four-year degree is a substantial financial decision. At Santa Clara University, we believe that exceptional students, regardless of their financial resources, are worthy of an academic experience equal to their achievements. This reality dictates that we increase our endowment to help offset the financial burden of a Santa Clara University education.

Eoin Lyons: “Four years flew by. And here I am. The first in my family to graduate from a college or university.

“I can say with confidence that I have taken full advantage of the blessed opportunity offered to me by Santa Clara University’s Johnson Scholars Program. Immersion trips to our nation’s border towns and Panamanian health clinics. Internships with Franklin Templeton Investments and KPMG in India and Silicon Valley. Studying abroad in London. Serving as a Student Ambassador. I am so grateful for my experience here, especially the support of the Leadership Excellence and Academic Development Scholars Program. I experienced a world beyond my imagination.

“In high school, I knew that a degree from a four-year college or university would be an eventual step on my life’s path. I did not know where that step would rest—or the financial burden it would carry—but a step nonetheless. And then the letters started to appear in our mailbox.

“Boston College. Georgetown University. University of Notre Dame. University of California, Los Angeles. University of Chicago. I had been accepted to nearly every school that received my application. But only one offered our family a financial package that would leave me debt-free and open doors to unimaginable opportunity: Santa Clara University.”

Established in 2003, the Leadership Excellence and Academic Development Scholars Program supports first-generation students.
Eoin Lyons ’19, Johnson Scholar, Leadership Excellence and Academic Development Scholar
In 2018 Hemant Thapar ’73, M.S. ’75, P ’14, was bestowed the School of Engineering’s highest alumni honor: the Distinguished Engineering Alumni Award. Hemant, a scholarship recipient, and his wife, Suniti P ’14, are committed to guaranteeing a Santa Clara University experience for generations of students to come. Students like Michael Mehta ’19 and Yasmin Torres ’20.
Christopher Kitts, Ph.D., P ’20, Associate Dean for Research and Faculty Development, Associate Professor of Mechanical Engineering, School of Engineering
Engineering Innovation and COLLABORATION

Santa Clara University promotes innovation in greater service of humanity, with a special concern for the underserved, disadvantaged, and marginalized. Many of today’s most challenging problems in environmental monitoring, global health, and disaster response defy conventional solutions and require that we embrace a new philosophy—an approach that transcends the capabilities of any one discipline.

Christopher Kitts: “I am a firm believer in the need for interdisciplinary academic collaboration to effectively prepare our students with the knowledge and confidence—and equip our faculty with the ability and resources—to solve global problems. One of the greatest objectives of the Sobrato Campus for Discovery and Innovation is to promote this vision. Not just among students but faculty as well.

“Today’s world requires the aptitude to interpret perspective. It is no coincidence that the Jesuit, Catholic faith encourages this same significant life skill. We are all different people of different circumstances. Only once we come to understand and agree that much can be learned from differences do we have the capacity to push forward—to achieve shared objectives. Solving challenges of industry and community is no different. And the Sobrato Campus will promote a dialogue of curiosity and understanding across academic disciplines. Engineering collaborating with anthropology. Chemistry and biology with social entrepreneurship. The physical barriers preventing ease of collaboration and programming—continuous learning—vanish.

“As for now, the momentum of our School of Engineering has never been greater. The School is relentless in its pursuit to create transformational educational experiences. And our impact is real. These experiences are real. For example, NASA contracts the School to run mission control for professional spacecraft. What could be more real than that? How about that for a reason to enroll—or work—at Santa Clara University’s School of Engineering? An experience you just will not find at other academic institutions.”

By expanding its humanitarian engineering focus and institutionalizing a distinctive technical innovation and entrepreneurial program, the University will enhance the reputation of its School of Engineering as a world-class leader.
Tricia Tran ‘16,
Leadership Excellence and Academic Development Scholar
Transformative Learning EXPERIENCES

Our University continues its devotion to maintain a campus environment that encourages ethical character formation through the exploration of broad perspectives. Santa Clara University people—with their gifts and goals—are driven to make a difference. We come from all walks of life. And localities. We travel seas, coasts, highways, and city blocks to call this University our home. And when we’re together, home is exactly what this place feels like.

Tricia Tran: “The University provides an atmosphere that promotes intellectual curiosity and compassion—a community few universities offer. Looking back on my undergraduate experience, I crossed the commencement stage with something far more valuable than a degree: a transformative experience enriched by the diversity of the student and faculty population. I learned how to learn. My academic curriculum supplemented by experiential learning opportunities pushed me to attain the skills to become a lifelong learner. An inherent problem solver.

“Learning does not stop after we don cap and gown. It continues in professional and social settings throughout life. While I may not be working in my fields of undergraduate study, in my role as a technical sourcer at Pinterest I am successful because Santa Clara University provided me with the skills and confidence to accomplish any task set before me. To achieve beyond my imagination.

“I was the first in my family to attend and graduate from a four-year college or university. As a result of my circumstance, there was a lot of unknown associated with the college search process. And the unknown quickly burgeoned during that first night living in my residence hall. I have to credit the University’s Leadership Excellence and Academic Development Scholars Program for so much of my success. The Program operated as a second family and support group during my four undergraduate years. We shared similar life experiences and ultimately the same feeling of accomplishment the afternoon of our commencement.”

Talented and high-achieving students come to Santa Clara University from all socioeconomic backgrounds. We are dedicated to growing our endowment in support of scholarship funds.
Latanya Hilton ’96, MBA ’04, has built a career of fostering social good. She has made a point of supporting people of color, first generation college students, and students with financial need. Sam Bertram ’16, M.S. ’18, is climbing new heights with robotics and agriculture—and he has given back to support the School of Engineering.
Dedicated in 2008, the Harrington Learning Commons, Sobrato Technology Center, and Orradre Library was designed to support our students’ expanding intellectual requirements.
A defining moment is upon us. Our future is clear, and your partnership is critical.

Together we will achieve Santa Clara University’s $1 billion goal to advance a distinctive Jesuit education that develops persons of character who will lead lives of integrity, meaning, and purpose.

Through our shared vision, the University will continue to thrive as a home to generations of change leaders—creative problem-solvers relentlessly innovating with a mission.
Opening Doors

Whether it is paving the way for new students, faculty, or NCAA Division I championships, Santa Clara University is strategically positioned to attain national recognition.

Ensuring that our extraordinary curriculum is accessible to high-achieving students is paramount to expanding the University’s reach.

And the need for a diverse campus does not end with our student body. As we look to our future, we must also commit to attracting and retaining excellent faculty and staff. With your help, we will grow financial resources.

Cultivating and Supporting Outstanding Faculty  At the heart of the academic experience are exemplary teaching scholars committed to the values of the Jesuit, Catholic tradition—faculty who share an infectious passion for knowledge and inspire the hearts and minds of their students.

One of our highest priorities is to attract, support, and retain a distinguished and diverse faculty who strengthen our departments and schools. We seek to elevate an elite set of faculty to a number of new endowed professorships and chairs. Additionally, the University aspires to invest significant funds in faculty development programs that support a vibrant intellectual community, encourage pedagogical advancement, and foster innovative evidence-based learning experiences for our students.

Undergraduate Financial Aid  Talented prospective students come from all socioeconomic backgrounds, but not all motivated and capable students can afford a Santa Clara University education.

We are dedicated to growing our endowment in support of scholarship funds to better meet our students’ financial needs. Expanded endowed scholarships will not only relieve the financial strain on students who depend on need- and merit-based aid but also incentivize highly sought-after students to enroll at and graduate from Santa Clara University.

Established in 2003, the Leadership Excellence and Academic Development Scholars Program attracts gifted first-generation students and provides them with a structured four-year set of academic and co-curricular experiences. The University aspires to expand the Program in support of increased enrollment among first-generation students.
The world yearns for leaders who discern the right thing to do when faced with an ethical dilemma and have the courage to pursue it. Our University forms such leaders at the intersection of the liberal arts and the professions, educated with the indelible values and ethics of the Jesuit, Catholic tradition.

We must elevate transformative learning experiences that connect generations of Santa Clara University alumni. Whether our students and faculty thrive within the boundaries of campus or venture out to serve isolated regions, they do so with the knowledge, skills, and mind-set instilled by this preeminent University. In supporting the campaign, you guarantee a timeless education that will profoundly change lives and communities.

Scholarships for Graduate Professional Students  The University also offers a comprehensive set of graduate professional programs in law, engineering, business, education, counseling psychology, theology, and ministry. Because many graduate students are saddled with debt from their undergraduate studies, it is critical that the University raise funds for endowed scholarships across its graduate programs. The need for scholarships is particularly acute within professional programs that prepare graduates to pursue noble vocations offering limited compensation opportunities.

Championship-Caliber Athletics  Bronco Athletics are a core part of the Santa Clara University experience.

For generations our University has produced Olympians, all-Americans, world champions, all-stars, and hall-of-fame athletes. And now the University is placing an even higher priority on providing a first-class experience for student-athletes. Pivotal to achieving this goal is the plan to build an Athletics program that will dramatically enhance national awareness of the University, amplify school spirit and alumni pride, and provide student-athletes with a meaningful, challenging, nurturing, and rewarding college experience.

To continue building a top-notch Athletics program while giving each of the 20 Division I intercollegiate teams the ability to compete, investment goals must be achieved for recruiting, scholarships, staffing, resources, and facilities. The Stephen C. and Patricia A. Schott Athletic Excellence Center is the first step in propelling Bronco Athletics to new heights.

PRIORITY GOAL: $166.55 MILLION

Educating the Whole Person

This campaign seeks to ensure and enhance the holistic education that Santa Clara University promises to each student.

The world yearns for leaders who discern the right thing to do when faced with an ethical dilemma and have the courage to pursue it. Our University forms such leaders at the intersection of the liberal arts and the professions, educated with the indelible values and ethics of the Jesuit, Catholic tradition.

We must elevate transformative learning experiences that connect generations of Santa Clara University alumni.

Santa Clara University offers a broad spectrum of undergraduate and graduate programs that challenge students to stretch their intellectual curiosity.
Broadening the Liberal Arts  Drawing from traditional forms of expression and the latest in digital technologies, the newly established Center for the Arts and Humanities combines the Jesuit passion for scholarly excellence and service with Silicon Valley innovation. The Center advances interdisciplinary collaboration in research, teaching, and creative activity on campus and in the community.

Cultivating a Deeper Sense of Community  Santa Clara University’s nationally recognized program of Residential Learning Communities integrates the academic, social, and spiritual formation of our first-year undergraduate students. A successful campaign will enable the University to expand this experience and surround all first- and second-year undergraduates with a set of developmental experiences that will lead to greater student fulfillment and success.

Engaging Bright Minds in Life-Changing Experiences  Transformative learning requires that students explore the world. Study abroad, internships, summer research, co-curricular ethics programs, vocational discernment, prestigious fellowships, mentoring, and spiritual retreat programs are critical components of the Santa Clara University experience. Supporting student engagement through these life-changing opportunities, campaign funds will allow increased participation in transformative, experiential learning.

Strengthening Our Jesuit Character and Programs in Theology and Ministry  The Ignatian Center for Jesuit Education extends the Ignatian Jesuit worldview to the campus community and beyond, applying the 500-year-old Jesuit educational tradition to the realities of the twenty-first century. Innovative programming engages students, faculty, staff, alumni, and community members in this rich heritage by cultivating thought, reflection, discernment, and action. The Jesuit School of Theology educates scholars and ministers to serve the Church and society. By establishing a new endowed professorship and sponsoring visiting international scholars on the Berkeley campus, the School will deepen its commitment to intellectual and spiritual depth in its scholarship, teaching, reflection, and service.

Pursuing Social Justice  Santa Clara University serves as a model to develop tomorrow’s ethical thought leaders and empower students to forge a more humane, just, and sustainable world. By integrating real-world experiences with classroom learning, our students acquire a holistic perspective that makes their time here unprecedented. Students engage in opportunities to aid local, domestic, and international communities through immersion experiences. They expand educational access for underserved populations in Silicon Valley. And participation in fellowships, internships, and coursework within community-based learning environments produces well-rounded graduates. Regardless of the context, students are challenged intellectually, spiritually, and socially to become more empathetic, to demonstrate resilience in the face of adversity, and to lead with character.

Creating Inspirational, Collaborative Learning Environments  With the goal to enrich and deepen student learning, our classrooms, studios, and common spaces will be upgraded significantly. As environments are renovated and centers are expanded, curricula will be redesigned to promote innovative use of our advanced educational and technological capabilities. This undertaking will enhance the intellectual, artistic, cultural, and spiritual lives of students, faculty, and the broader community.

More than 30 percent of our undergraduate students study abroad at some point, compared with a national average of 4 percent.
Innovating for the World

The spirit of Silicon Valley—blended with our Jesuit, Catholic tradition of educating compassionate leaders—thrives at Santa Clara University.

In support of the University’s mission, we work to raise awareness and address social inequity across a global community and economy. To that end, we promote innovation in greater service to humanity, with a special concern for the underserved, disadvantaged, and marginalized.

**Sobrato Campus for Discovery and Innovation** Many of today’s most challenging problems—in climate, global health, and renewable energy, to name a few—defy conventional solutions. Problems that require us to embrace a new philosophy of innovation—an approach that transcends the capabilities of any one discipline. By combining faculty expertise from multiple fields of study, the University aspires to forge innovative solutions that will have far greater impact.

The Sobrato Campus for Discovery and Innovation will house engineering and natural science departments, along with Miller Center for Social Entrepreneurship, to establish a state-of-the-art teaching, learning, and research environment. Facilities will contain dedicated labs and offices, flexible spaces for events and lectures, and reconfigurable classrooms for courses that promote discovery, innovation, and entrepreneurial thinking. The Sobrato Campus will be a collaborative hub for the advancement of technology and humanity.

**Enhancing and Expanding Miller Center Programs** The Global Social Benefit Institute accelerates entrepreneurship to end global poverty and protect the planet. The opportunity is upon us to expand the capacity of the Institute’s accelerator programs and to provide rigorous training and executive mentorship to help social entrepreneurs improve lives. The expansion will hasten the growth of innovation-based social ventures that bring environmentally sustainable solutions to resolve the challenges of those living in poverty globally and domestically.

**Enriching Engineering** Engineering students, faculty, and alumni pursue a vision to transform industry and communities by developing new technologies that address real-world problems.

By expanding our humanitarian engineering focus and institutionalizing a distinctive technical innovation and entrepreneurial program, our University will enhance the quality and reputation of the School of Engineering as a world-class leader in engineering education.

**Pioneering Business Innovation** The Silicon Valley business climate serves as a catalyst for identifying, piloting, and studying global economic trends. Our internationally respected Leavey School of Business is developing novel programming in retail, real estate, entrepreneurship, and conscientious capitalism to produce insightful applied research, help advance the University’s visibility, and attract the most highly qualified students from across the nation.

Santa Clara University’s storied campus is the educational hub of Silicon Valley, one of the world’s most innovative business and socially diverse environments.
Shaping the Future of Law  Santa Clara University’s School of Law, one of the nation’s most diverse law schools, is dedicated to educating lawyers who lead at the complex intersection of law, technology, business, justice, and ethics. Building on its nationally ranked intellectual property law program, the School is poised to advance its world-renowned High Tech Law Institute and the Entrepreneurs’ Law Clinic. Both support the region’s entrepreneurial ecosystem and introduce law students to real-life issues that confront Silicon Valley companies.

Advancing Teacher Education and Counseling Psychology  The School of Education and Counseling Psychology trains outstanding educators, therapists, and advocates, grounded in Jesuit values. Building on the School’s extensive work for the Latinx community of East San Jose and its deep engagement with Catholic schools in the Diocese of San Jose, the School is establishing a nationally recognized Latinx Education Research Center and a Center for Catholic Education.

In-Progress and Completed Campaign Initiatives

Based on the successful leadership phase of the campaign, the following capital projects are already completed or currently underway. Funding opportunities remain available for all capital projects.

Edward M. Dowd Art and Art History Building  The state-of-the-art Edward M. Dowd Art and Art History Building supports an environment that provides a central home for an integrated fine arts program. This facility inspires creativity, collaboration, and visual literacy to develop creative thinkers and imaginative problem-solvers. The University will significantly increase opportunities for scholarship students to study the fine arts, for visiting artists to share their passion through their work, and for our community to explore the visual arts.

The Howard S. and Alida S. Charney Hall of Law  The Howard S. and Alida S. Charney Hall of Law’s cutting-edge facilities support the School of Law and future collaborative programs with other academic units. This inspiring, eco-friendly building—a modern interpretation of the University’s signature Mission-style architecture—demonstrates Santa Clara University’s support for the vital role that lawyers play in advising Silicon Valley clients, shaping the justice system, and serving the greater community. With flexible learning spaces and sophisticated classroom technology, Charney Hall strengthens the School of Law’s competitiveness, attracts exceptional faculty, supports a high-achieving student body, and contributes to forming leaders operating at the intersection of law, technology, business, justice, and ethics.

Our University plays a key role in forming the next generation of citizens and leaders.
Stephen C. and Patricia A. Schott Athletic Excellence Center  The Stephen C. and Patricia A. Schott Athletic Excellence Center, a 50,000-square-foot facility adjacent to the Leavey Center, integrates into a seamless neighborhood of beautiful facilities that celebrate the Jesuit commitment to the whole person. Focusing on the celebration of sport, the game-changing Athletic Excellence Center is a complete care center that will enhance the student-athlete experience to support the University’s goal to recruit world-class athletes. The Center will be equipped with an academic center, sports medicine and sports performance areas, as well as two gymnasiums to offer a balance of the mind, body, and soul.

Robert F. Benson Memorial Center Renovation  The Robert F. Benson Memorial Center will be rejuvenated and expanded into a vibrant space that provides new facilities and supports students in their holistic development—socially, spiritually, intellectually, and professionally.

At its optimum, Benson Center serves as the hub for community building, where memories are made and relationships are cultivated. Its proximity to residence halls, the Learning Commons, academic spaces, and recreational opportunities enables Benson Center to serve as a special gathering place where long-term friendships are made. Added capacity is also required to support a projected 10 percent increase in undergraduate enrollment.

Stephen A. Finn Residence Hall  The residential environment provides a range of activities to promote successful assimilation. The Stephen A. Finn Residence Hall is under construction to increase on-campus residential capacity by more than 350 students. This will support the planned growth of the undergraduate student body, increase the percentage of undergraduates who live on campus, and provide the structure by which the University can deliver an enhanced residential experience for undergraduates during their first two academic years.

Your support will help ensure a Santa Clara University experience for generations of students to come. Please visit campaign.scu.edu to learn more about ways to advance our campaign.
